ABOUT ME

I am a Project Manager and IT Developer. I am also a Start-Up Enthusiast and love working with new and innovative technologies.

I have experience in developing web applications, setting up cloud services, managing servers, etc., as well as working as a team leader and managing projects from concept to implementation.

In my work, I use my acquired experience in marketing, processes and certifications as well as people management. I am loyal and responsible.

WORK EXPERIENCE

03/2015 – 08/2016 Praha, Czechia

JUNIOR PROJECT MANAGER FOX HUNTER

As a Junior Project Manager, I had the chance to work on marketing campaigns for top European brands. My responsibilities included managing a satellite office in Brno and overseeing the work of marketers. I contributed to the creation of roadshows, events, graphics, videos, and PPC ads. Through our efforts, we were recognized with the EUBEA 2016 award.

01/2019 – 01/2021 Czechia

INNOVATION MANAGER IN FULFILMENT CENTRE AMAZON CORE

As an Innovation Manager in a fulfilment centre, I focused on improving the operations of an Amazon fulfilment centre. My work involved spending a significant amount of time in the actual fulfilment centre, where packages from the Amazon.de e-shop were received, stored, and shipped.

I was responsible for taking proposed innovations through the test phase, during which I collected data on automatic loading, weighing, and registration of shipments on receiving and conveyor belts. I then analyzed this data to identify opportunities to improve the solution and roll it out across the entire 95,000 m² warehouse, which employed more than 5,000 people. In addition, I spent about 10% of my time designing and implementing measures to prevent the spread of Covid-19 within the fulfilment centre.

09/2016 – 06/2019 Zlin, Prague, Bratislava, Budapest, Katowice

BUSINESS DEVELOPER - FREELANCER

As a business developer, I specialized in managing start-ups and spin-offs. My responsibilities included preparing business documentation, communicating with authorities, obtaining project certification, securing financing, developing products, and other tasks necessary to launch a new brand and product on the market. The projects I work on involve a wide range of industries, including electromobility, greenhouse production, wastewater treatment, aircraft engines, food traceability, and facilities. I develop solutions for these various sectors.

In addition to these responsibilities, I also created advertising for political parties in the Czech Republic (SSČR and ČSSD), Austria (FPÖ), and Poland (Kukiz'15).

Finally, I oversaw my own sales team, which handled energy sales for companies and municipalities.

02/2020 – CURRENT Prague, Czechia

FOUNDER GITYCA DEVELOPMENT

I am the sole permanent member of this start-up and am currently working on developing a web application to make it easier for developers worldwide to deploy and secure their code. In the process, I am also learning new technologies.

11/2021 – 07/2023 Prague, Czechia

PROJECT ENGINEER SIDAT

As a project manager in the field of industrial informatics, I lead projects that involve delivering advanced firmware and software solutions, such as factory control systems, energy and other monitoring and control panels for specific technologies, and company control systems. My technical expertise includes working with CAD/CAM tools (such as NX

MCD), MES systems (such as OpCenter), networks (including Ethernet, Virtual Networks, Modbus, MBus, and LoRaWAN for IoT), IoT sensors, Windows and Linux servers, and virtualization using VMware. I collaborate with colleagues to ensure the successful delivery of these projects.

03/2023 – CURRENT Praha, Czechia
AVECO S.R.O.

As a project engineer, I oversee projects focused on the development of automation systems used in television broadcasting. I am responsible for delivering cutting-edge firmware and software solutions tailored to client needs, including control systems for individual broadcast studios and their applications. Operating and managing both Windows and Linux servers is a natural fit for me. I am also well versed in virtualization using VMware, which allows me to create virtual environments that optimize resource utilization and scalability.

In summary, as a project engineer at a broadcast automation company, I combine technical expertise with teamwork to foster innovation and successful implementation of state-of-the-art automation solutions for the broadcast industry.

LANGUAGE SKILLS

Mother tongue(s): **CZECH**

Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction
